OFFICIAL PARTNER

COMPACT SWEEPER

05/2018

VS4

The compact cleaning professional

COMPACT. MANOEUVRABLE. HIGH SUCTION PERFORMANCE.

VS4

4 m³

+

750 l

2,200 mm to 3,550 mm

INNOVATIVE SWEEPING TECHNOLOGY
MADE IN GERMANY

THE FLEXIBLE AND COMPACT CLEANING MACHINE

The VS4 belongs to the compact class but is just as powerful as the larger sweepers from BROCK. Due to its clear and compact design with a capacity of 4m³, the VS4 is very manoeuvrable and user-friendly. This makes it ideal for cleaning applications in even the smallest streets and alleys.

Compact sweepers from BROCK Kehrtechnik GmbH are innovative sweeper units made in Germany paired with the customers' favourite chassis types. Efficient, modern drive concepts form the interface between the chassis and sweeper body. The sweeper unit can be driven, for example, by an additional superstructure engine according to country-specific exhaust emission standards or a hydrostatic drive that allows the machine to run at an optimum sweeping speed.

Additional equipment such as the leaf suction device is particularly suitable for municipalities and can be used in many different ways.

100% ELECTRIC SWEEPING

As an environmentally friendly alternative, the VS4 can be electrically powered by battery packs in conjunction with a Mitsubishi FUSO Canter Plug-In Hybrid chassis.

Structure and carrier vehicle operate fully autonomous from one another. A FUSO standard chassis for example can also be used as a basis. This is made possible by the battery packs that drive the fan electrically.

HIGH TIPPING

The special high tipping technology allows raising the debris hopper to 1.50 m and emptying it in a provided container.

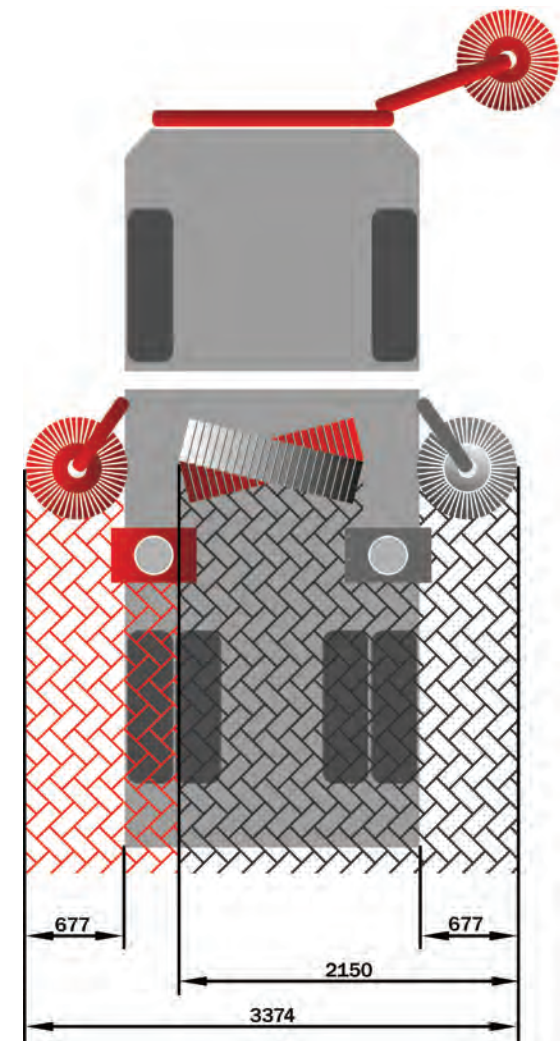

SUMMER AND WINTER SERVICE

A sweeping machine for summer, a spreader vehicle for winter? Flexible solutions for more efficiency. In connection with the robust FUSO chassis and a BROCK sweeper unit that is no problem.

SWEEPING WIDTHS

Depending on the additional equipment, a sweeping or washing width of 2,200 mm to 3,550 mm is possible.

Standard configurations are marked in grey.

DIVERSE VERSIONS

Sweeper unit

Auxiliary engine	•
Reduction gears	•
Hydrostat (only with a manual gearbox)	•
100% electric	•

Chassis

Automatic	•
Manual	•
Plug-In Hybrid	•
100% electric	•

Your sweeper as individual as you are - that is our strength. We find the perfect solution for your cleaning work. With a multitude of possibilities and variations, your machine becomes the ultimate cleaning professional.

We reserve the right to make technical changes. Product photos may include special solutions and additional equipment.
