

# Individual and capable

LAWECO lifting systems for the sheet metal industry

# Absolute reliability

LAWECO coil handling systems and special solutions

**LAWECO can offer tailor-made solutions for the sheet metal industry, whether you have a rolling mill or a sheet metal processing plant.**

You can always rely on LAWECO, especially when maximum processing reliability is required. From planning to installation, LAWECO offers not only individual lifting systems but also complex integrated concepts and special solutions including the corresponding engineering.

## LAWECO coil lifting truck

- coil weight up to 50 t
- prism construction or support rollers
- automatic or manual tilt protection systems
- customised hydraulic system with switching or proportional valve technology
- handling technology, turntable or special construction
- integrated weighing technology
- special travelling gear
- individual safety systems

## LAWECO coil rack

- stationary or movable

## LAWECO coil transport truck

- high convenience and safety for coil handling

## LAWECO coil turning device

- stationary or with lifting function

## LAWECO retrofit

- replace and modernise your lifting systems in existing machine lines

# With maximum precision

LAWECO stacking lift platforms and stacking carriages

## **LAWECO also excels at handling blanks.**

The tried and tested LAWECO stacking lift platforms can be used for precise stacking, separating, turning and processing of any blank formats in cutting and press lines. Different coupling systems make handling long blank stacks possible without any problems.

### Advantages

- ✓ load bearing capacity of up to 150 t
- ✓ hydraulics with switching or proportional valve technology
- ✓ movable or stationary
- ✓ with coupling facility
- ✓ integrated materials handling technology
- ✓ with or without synchronous run control

# Perfect handling of blanks through high stacking precision

in machine lines for lateral and longitudinal items or in press lines

**Benefit from the proven competence of the leading lifting system manufacturer in Europe.** Heavy loads need to be moved especially in the sheet metal industry. The sturdy LAWECO lifting systems, designed to meet the highest safety standards, will guarantee the unrestricted availability and functionality of your machine line.

# LAWECO – In good hands

**It is the sum total of details that makes LAWECO first choice – no matter which lifting solution is required.**

Put your trust in Europe's leading manufacturer of individual lifting solutions. In cutting edge technology, made in Germany, setting standards in precision, safety and functionality. In over 30 years of experience of our highly motivated and specialised team. In consistent customer and service orientation, reflected in the large proportion of repeat business and an extremely high level of satisfaction.

In special products tailored to your requirements right down to the last detail. And of course, in the proverbial Westphalian honesty and reliability that you can always depend on as our customer.
